Facts and Myths about Male Impotency

Male impotence is also known as **erectile dysfunction** (ED), and it is one of the most common of all the sexual problems in the world. There are a number of myths that surround ED, and you must not fall prey to them, as doing so would only worsen the ED problems you already have. Let us take a look at some of the major myths about ED that are circulating around:

- **ED Affects Only Elderly Men:** This is a complete myth; studies show that more and more young men are suffering from male impotence, all over the world.
- **ED Is In No Way Dangerous:** This is a myth. The fact is, ED can be a sign that you are suffering from some illness, even one that could be fatal, such as a heart problem, diabetes, or circulatory issues.
- **ED Is Because You Are Not Attracted To Your Partner:** This may be one reason, but it is not the only reason. There are a number of physical and psychological reasons why you can suffer male impotency.
- **ED Is Something You Have To Live With As You Get Old:** Totally myth. There are a number of treatments that are available for dealing with male impotence; one of them is sure to work for you. And one such world-class treatment being used by men all over the world to deal with **male sexual impotence** is called **Avana**.
